## 1 Humble Room on Mt. Takao

This github pages is a site to publish some of my ideas. There used to be a blog, unfortunately due to some trivials, it had been shutdown. I'll put on my new articles here and try to re-upload some of my articles written in the past.

### 1.1 About me

I'm a SCUT undergraduate majored in CS. No publications currently. I'm working on a research of pedestrian detection & domain adaptation, also interested in programming languages (C++/Rust/Lisp/...) and computer architecture. I'm short of knowledge but insisting on learning.

### 1.2 Index

1. [Enum of Rust used in Lisp interpreter](#)
2. If you are working with Rust or Clojure, maybe you can check my emacs configuration: [kabu1204/emacs.d](#)
3. [Local ELPA mirror](#)

### 1.3 Schedules

My Schedules:[agenda](#)

### 1.4 Contact me
